💈 BarberShop – Online Booking & Management System

🔷 **Description:**
BarberShop is an **online booking and management system for barbershops**, designed to streamline appointment scheduling for customers and simplify operations for business owners. The platform allows clients to **book services quickly**, **view barber profiles**, and **leave ratings/reviews**. For barbershop owners, it provides tools to **manage client databases**, **adjust work schedules**, and **track revenue**.

🛠 **Technologies:**

- **Frontend:** React.js, Redux, Tailwind CSS, Axios

- **Backend:** Node.js (Express), MongoDB

- **Integrations:** Firebase Authentication, Stripe API (payments), Google Maps API

🔥 **Key Features:**

Key Features:

✅ Online appointment booking for customers
✅ Filter barbers and services by availability/specialty
✅ Rating and review system
✅ Admin dashboard (client management, appointment tracking, revenue analytics)
✅ Secure payment processing (Stripe integration)
